SUMMARY

I am an information technologist who is flexible and with the excellent analytical skills to drive change in the IT arena. I am quick to learn new skills. I am looking for Job opportunities to help sharpen the skills gained and learn more about the information technology industry.

PROFESIONAL EXPERIENCE

August 2017 – August 2017:   Voter Clerk – Independent Electoral and Boundaries

Commission (IEBC).

May 2017 – May 2017:   Voter Verification – Independent Electoral and Boundaries

Commission (IEBC).

ACHIEVEMENTS

Communication and Analytical skills.

I am critical in analysis of details and take pride in my attention to details and problem-solving skills. I am excellent in communication both written and verbal.

MS office skills.

Good working knowledge of MS office packages and comfortably works with MS word and other office programs. This is highly displayed from the vast experience I gained learning at the serenity college in Gilgil.

Project Management

By successfully leading my team in the KHMIS hackathon I can say that I have good organization and project management skills since I was able to oversee the implementation of various aspects of the project.

Leadership skills.

I have exercised my leadership skills while participating in the hackathon. This was evident as I was able to delegate duties and ensured that my group was able to work and produce the output that was required.

Interpersonal skills.

I have excellent interpersonal skills, which have in effect improved my relations not only with colleagues but also with the clients served. This was very critical to me as it helped gather relevant data from the various people that I managed to interview in several works and online meetings.

CREATIVITY

Creativity comes from a point of view that I can easily navigate various circumstances to obtain the solutions that are available in place due to my analysis of the various angles and perspectives that I can take to arrive at the required solutions tabled.
